### DETERMINING MONTHLY INCOME FOR EARNINGS & WAGES

**Monthly income** for all household members must be reported in Part 4 of this application. Income means any money regularly received from work, child support, alimony, pensions, retirements, social security or any other source. Exclude student/school loans.

Household members who are not paid monthly should change earnings into monthly income by doing the following:

**Household members who are paid every week:** Multiply total earnings and wages for one pay period, before deductions, by 52. Then divide by 12. The resulting amount is the total monthly income.

**Household members who are paid every 2 weeks:** Multiply total earnings and wages for one pay period, before deductions, by 26. Then divide by 12. The resulting amount is the total monthly income.

**Household members who are paid twice a month:** Multiply total earnings and wages for one pay period, before deductions, by 24 then divide by 12. The resulting amount is the total monthly income.

**Household members who are seasonal workers or work less than 12 months:** Project annual rate of income to accurately represent actual circumstances then divide by 12. The resulting amount is the projected monthly income.

Note: Money received from a business or farm owned by you should be reported as "net income." *Net Income is defined as the total income left after business and farm operating expenses are subtracted from gross receipts.*
